### Table of Contents

#### Keynotes

Toward Humanism of the City: A Better City, Happier Citizens  
Soo-Sam KIM, Mihong LEE ..................................................... 2

Sustainable Conceptual Design of Structures between Form Finding and Free Form Design: The Ruled Freedom  
Tobia ZORDAN ................................................................ 6

The Integration of Engineering and Architecture  
Tristram CARFRAE ............................................................ 29

Collapse! Aftermath and Investigation  
Gary KLEIN ................................................................... 38

Recent Study on Seismic Performance and Response Control of Tall Buildings  
Xilin LU, Huanjun JIANG ....................................................... 44

#### 1A. Service Life Perspective: Probabilistic Load Rating and Modeling

Investigation of Actual Wheel Load Distribution and Its Practical Implication for Design  
Chang Kook OH, Doobyong BAE, Kee-jeung HONG, Jaeyoun CHOI ................. 54

Statistical Traffic Load Model Based on Weight in Motion Monitoring for Bridge Safety Assessment  
Shouwang SUN, Limin SUN ..................................................... 56

WIM-Based Live Load Models for Highway Bridges  
Andrzej S. NOWAK, Przemyslaw RAKOCZY ................................... 58

Probabilistic Load Model for Ship-Bridge Collision Using Monte Carlo Simulation  
Jeong-Hyun LIM, Wonsuk PARK, Hyun-Joong KIM, Hyun-Moo KOH .......... 60

Statistical Calibration of Safety Factors for Headed Stud Shear Connectors in Composite Construction  
Stephen HICKS, Audsley JONES ................................................ 62

An Estimation of the Corrosion Rate by Airborne Salt around Bridge Section  
Eiji IWASAKI, Masatsugu NAGAI ............................................ 64

A Probabilistic Assessment Methodology for Life Cycle Analysis of Structures  
Jose Campos e MATOS, Isabel Brito VALENTE, Paulo Sousa CRUZ,  
Luis Canhoto NEVES ........................................................... 66

Performance Prediction of Concrete Elements in Bridge Substructures using Integrated Deterioration Method  
Guoping BU, Jaeho LEE, Hong GUAN, Michael BLUMENSTEIN,  
Yew-Chaye LOO ................................................................. 68
1B. Innovative Structures: Outstanding Infrastructures

Communication Concepts for Handling Projects More Efficiently
Peter SEITZ .................................................................72

Gardens by the Bay, Marina South Gardens
Luis Eduardo FERNANDEZ CANON ....................................74

The Structural Design of a 30 Meter Steel Cantilever Structure
Kaoru KUJIME, Toshihiko KOUNO, Takeshi ASA KAWA ....................76

Bucking of Complex, Steel Structures: City of Manchester Stadium, Barcelona
Bullring, BA London Eye, 2012 London Olympic Stadium, Aviva Stadium,
Infinity Footbridge
Fergus McCORMICK .....................................................78

Tunnels for High-Speed Railway Lines Based on the TMG Concept
Silvino POMPEU-SANTOS .............................................80

The Impossible Becomes Possible - An Infrastructure Project
Oskar-H. PEKOLL, Thomas WIESER .....................................82

Design of Cut-and-Cover Tunnel in Seismically-Active Urban Area:
Presidio Parkway Replacement Project
Heui LEE, Qiyu LIU ..........................................................84

Cold-Bent Laminated Glass and Steel Canopy for a Bus Station Next to
Amsterdam Central Station
László VAKÁR, Jan van WOLFSWINKEL, Bert SNIJDER ....................86

1C. Structures & Materials: Fiber Reinforced Materials

Carbon Fibre Reinforced Polymers in Bridge Engineering
Urs MEIER .....................................................................90

Redundancy Evaluation of Integral Bridges Under Lateral Loads and Effect of
FRP Reinforcement on System Behavior
Giorgio ANITORI, Joan R. CASAS .........................................92

Innovative CFCC Prestressed Decked Bulb T Beam Bridge System
Nabil GRACE, Tsuyoshi ENOMOTO, Prince BAAH, Mena BEBAWY ........94

Evaluation of Optimised Truss Models for FRP Shear Strengthened RC Beams
Wee TEO, N. H. MOHD YUSUF, B. N. O. MBOUZIAVO, Y in HOR ........96

Shear Buckling Test and Prediction of Shear Load-carrying Capacity for
Steel Girder Bonded CFRP on Its Web
Takeshi MIYASHITA, Y usuke OKUYAMA, Dai WAKABA YASHI,
Norio KOIDE, Y uya HIDEKUMA, Akira KOBAYASHI, Wataru HORIMOTO,
Masatsugu NAGAI .........................................................98

Shear Behavior of RC Beams Using Ultra High Strength Fiber Reinforced
Concrete Precast Formworks
Chunyakom SIVALEEPUNTH, Toshimichi ICHINOMIYA, Shinichi YAMANOBE,
Tetsuya KONO, Naoki SOGABE, Y osihisa KANAMITSU .....................100
Constitutive Models for Steel Fibre Reinforced Concrete Members
Seong-Cheol LEE, Jae-Yeol CHO, Frank J. VECCHIO ........................................... 102

S1. The Design and Construction of Yi Sun-sin Bridge
Yi Sun-sin Bridge - Design of the Long Span Suspension Bridge With Streamlined Twin Box Girder
Myeong-jae LEE, Ho-chul KWON, Sang-hoon SHIN ............................................ 106
Yi Sun-sin Bridge: Construction of Two Different Anchorage Systems
Kyung Taek KIM, Chi Yong SONG, Young Soo SHIN ........................................ 108
Yi Sun-sin Bridge: High Speed Wind Tunnel Tests of Twin Box Girder
Seungho LEE, Jahgeol YOON, Soon-Duck KWON ............................................ 110
Yi Sun-sin Bridge-Technologies for Accelerated Construction of 270m-high Pylons
Hansol BAEK, Jihun KIM, Jaewook JANG, Younghwa SEO ................................. 112
Jaeho JUNG, Jonghoon MOON, Seungwook JEONG, Yongjun PARK ....................... 114
Yi Sun-sin Bridge: Several Unique Features on the Cable Erection Procedure
Jonghoo MOON, Seungwook JEONG, Hyunsok CHO ........................................ 116
Yi Sun-sin Bridge: Influence of the Lateral Rigidity of the Main Cable on the Cable Bands and Wrapping Wire
Minjae LEE, Jonghoon MOON, Jahgeol YOON ................................................... 118
Yi Sun-sin Bridge: Erection of Girder using Winch-Driven Lifting Gantry
Bonggyo JEONG, Seungwook JEONG, Youngsoo SHIN ..................................... 120

2A. Bridge Projects: Construction Challenges
Structural Characteristics of 3-Pylon Cable-Stayed Bridge Applying UHPC
Chang Su KIM, Woo Jong KIM, Kyung Sik CHO, Dong Won LEE, Jong Kyun BAEK,
Doo Jae LEE ........................................................................................................ 124
The Study and Application on Girder-Conveying By Track Cable Method for Stiffening Girder of Long-Span Suspension Bridge
Ruili SHEN, Yong YAN, Nianlai ZHANG, Maolin TANG ................................... 126
Cable Erection Plan of Ulsan Bridge
Kyuwang KIM, Namso CHO, Yongmook NA, Juwon SEO, Junshik BAIK .................. 128
Adaptive Geometrical Construction Control Method of Super Long Span Cable Stayed Bridges
Qiao LI, Yizhi BU, Qinhua ZHANG ..................................................................... 130
Improvement of Tendon Layout for the PSC Girder with Long Span
Do Hak KIM, Myeong Gyu SHIN, Tae Min KIM, Young Ho Woo, Moon Kyum KIM,
Yun Mook LIM .................................................................................................. 132
The Construction of The Double-Deck System Consisted of New Railway Deck and Existing Shinkansen Viaduct in Urban Area
Shin YAMAGUCHI, Takeshi TSUYOSHI, Masato YAMADA ................................. 134

2B. Structures in Urban Areas
Shaping of Multi-Span Concrete Viaducts in Urban Areas
Jerzy ONYSYK, Jan BILISZCZUK ...................................................... 138

A Signature Bridge in a Congested Urban Area
Thierry DUCLOS, Mohamed KETFI, Haythem AMAMI, Cedric AUBAZAC ........... 140

Rapid Replacement Work on The Nishi-Meihan Expressway Miyuki Bridge
Kazuya OHARA, Tsuyoshi MITSUDA, Michitaro KIHARA, Hiroshi MIZUNO, Takashi HARA, Shigeyuki MATSUI ..................................................... 142

Sava Bridge Project - Accelerated Design-Build Realization
Bratislav STIPANIC, Zoran FLORIC .................................................... 144

Construction Control of An Urban Space Steel Arch Bridge With Double Cable Planes
Chao LIU, Haijun XU, Jingwei ZHANG, Dong XU ..................................... 146

Modern Railway Stations as New Sophisticated Urban Spaces
Ewa Maria KIDO ............................................................................... 148

2C. A Service Life Perspective: Monitoring & Assessment
Assessment of Bridge Structural Performance using Advanced SHM Systems
Thomas SPULER, Gianni MOOR, Danilo DELLA CA', Thomas SCHURCH .......... 152

Dynamic Assessment of a Curved Cable-Stayed Bridge Based on Multi-Year Monitoring
Bruno BRISEGHELLA, Airong CHEN, Cheng LAN, Enrico MAZZAROLO, Xin RUAN, Enzo SIVIERO, Tobia ZORDAN .................................................. 155

Seismic Performance of Bridges with Rubber Bearing Systems under the 2011 Off the Pacific Coast of Tohoku Earthquake Ground Motions
Tongxiang AN, Osamu KIYOMIYA ......................................................... 157

Seismic Response Analysis of an Instrumented Base-Isolated Building in the 2011 Great East-Japan Earthquake
Dionysius M. SIRINGORINGO, Hisashi YAMASAKI, Yozo FUJINO ................... 159

Long-term Dynamic Monitoring of an Iron Arch Bridge
Fulvio BUSATTA, Carmelo GENTILE ...................................................... 161

Monitoring a 150-year-old Bridge During Construction of An Underpass for the London 2012 Games
David BAIRD, Martin KIRK, Piotr MUSZYNSKI ....................................... 163
2D. Technologies for Structural Design of Super-Tall Buildings

Practical Application of Mass Type Damper for Wind-Induced Vibration Control of Super-Tall Buildings
Sanghyun LEE, Lan CHUNG, Yunseok KIM, Sungsik WOO ................................. 166

Review of Wind Tunnel Tests of Lotte World Tower
Wonsul KIM, Seokjun JOO, Dongwoo KIM, Jaehyuk Lee ............................... 168

Structural Design of Lotte Jamsil Super Tall Building
Jongho KIM, Jidong KIM, Taejin KIM, Y eonki JUNG, Jaehyuk LEE, Yongjei LEE ... 170

Seismic Performance Evaluation of Twisted Braced Tube Systems
Woo-Suk Y OON, Dong-Hun LEE, Yongjei LEE, Taejin KIM, Dae-Eon KANG, Jong-Ho KIM ................................................................. 172

Time-Dependent Behaviors of RC Columns Subjected to Sustained Eccentric Loading
Tae-Sung EOM, Y ae-Y o K im, Dong-Woon JANG ......................................... 174

Performance of Shear Connectors in Concrete Mega Column-to-Steel Beam Connection
Hong Gun PARK, Jang Woon BAEK, Hyeon Jong HWANG, Jong Ho KIM, Jae Hyuk LEE ........................................................................... 176

3A. Innovation for Bridge Design & Construction

RAINBOW Footbridge
Augusto NASINI ....................................................................................... 180

Innovative Materials for the Fifth Bridge in San Sebastian, Spain
Ana LOREA, Sergio SAIZ ............................................................................. 182

Innovative Concept for the Steel Bridge over the Ter River in Girona, Spain
Juan SOBRINO ............................................................................................. 184

Kazimierz-Ludwinów Footbridge over the Vistula River in Cracow
Jan BILISZCZUK, Tomasz KAMINSKI, Robert TOCZKIEWICZ ..................... 186

Huey P. Long Bridge - Innovative Truss Erection Scheme
John BRESTIN, Hans HUTTON ..................................................................... 188

Aerodynamic Challenges and Solutions of Ultra Long Span Cable Stayed Bridges
Ngai YEUNG, Matt CARTER, Jung-hwi NOH, Sang-hoon LEE ...................... 190

Toward Repair and Redesign of Old Aqueduct Bridges in Rural Areas
Namhee K. HONG, Byoung Han CHOI, Gun Young Jeon ............................... 192

3B. Extending the Limits: Aerodynamics of Structures (I)

Hyperbolic paraboloid roofs with elliptical plane shape
Fabio RIZZO ............................................................................................. 196

Numerical Computations for Aerodynamic Forces on Triangular Sections
Jae Geun NOH, Sungsu LEE, Hak Sun KIM .................................................. 198
Development of a Web-based Distributed Computing Platform and Its Application in Evaluating Flutter Onset Velocity
Kuen-Bae LEE, Chongam KIM .......................................................... 200

The role of CFD in the conceptual design of high rise buildings
Kermin CHOK, Yuya ANDO, V V Sunil Kumar VYTLA .................... 202

A Unified Approach for the Aeroelastic Analysis by Elimination of Frequency Dependence of Aerodynamic Force
Kilje Jung, Hae Sung Lee, Ho-Kyung Kim, Hong Yun Hwa .................. 204

Vibration Absorber for Stay-Cables
Philipp EGGER, Wolfgang TRÄGER, Johann KOLLEGGER .................. 206

3C. A Service Life Perspective: Inspection & Monitoring
Robustness and Resilience -- Two Key Concepts for a Sustainable Built Environment
Bo L. O. EDLUND ........................................................................... 210

Inspection of welded joints: reliability of ultrasonic inspection and inspection intervals
Christian CREMONA ...................................................................... 212

Monitoring of Bridges Based on Vibration Frequencies
Ivana M EKJAVIC ........................................................................ 214

The Application of Smartphones in Bridge Inspection and Monitoring
Guido MORGENTHAL .................................................................... 216

Sustainable Large Arch Bridge Maintenance through Inspections, Assessments, Monitoring, Repairs and Service Life Modelling
Jure RADIC, Marija KUSTER, Jelena BLEIZIFFER ............................ 218

Roof over PGE Arena in Gdansk. Review of structure and monitoring system
Krzysztof ZÓLTOWSKI, Tomasz ROMASZKIEWICZ ............................... 220

Monitoring of Environmental Effects on Modal Estimates of Large Structures
Elsa CAETANO, Álvaro CUNHA, Carlos MOUTINHO, Wei-Hua HU, Sandro AMADOR .................................................. 222

S2. The Immersed Tunnel of Busan-Geoje Fixed Link
Busan-Geoje Fixed Link: General Outline of the Project
Sangkyoon JEONG, Jechun KIM, Imsig KOO ...................................... 226

Realisation of the Busan-Geoje Fixed Link - Large scale prefabrication for marine bridges
Jesper L. ASFERG, Lars T. SORENSEN, Peter D. FREDERIKSEN, Lars HAUGE .. 228

Wind-Resistant Measures of the Busan Geoje Fixed Link Bridges during Construction
Young-Min KIM, Sang-Kyoon JEONG, Seok-Jun JOO ......................... 230

The immersion details of the Busan-Geoje Immersed Tunnel
Bonghyun CHO, Jinwook HEO .................................................. 232
Innovative Infrastructures—Toward Human Urbanism

4A. Concrete Members: Performance for Durability (I)

Numerical and experimental analysis of a novel real-scale test set-up for the analysis of tensile membrane actions in concrete slabs
Dirk GOUVERNEUR, Robby CASPEELE, Luc TAERWE ............................ 242

An experimental study on the service and ultimate behaviour of post-tensioned composite slabs
Gianluca RANZI, Safat AL-DEEN, Brian UY ........................................ 244

Performance-based Design Approach for RC Bridge Columns with Interlocking Spirals under Cyclic Combined Loading Including Torsion Using Damage Index Model
Abdeldjelil Belarbi, Qian Li ................................................................. 246

Inhomogeneous Poisson Model for Peeling/Falling of Concrete
Kiyoyuki KAITO, Kodai MATSUOKA .................................................... 248

4B. Extending the Limits: Aerodynamics of Structures (II)

Wind Tunnel Tests of Vibration Control Devices for a Super Long Span Bridge Young-Min KIM, Younghak KWAK, Jörn SCHELLER, Uwe STAROSSEK ........... 258

An Experimental Investigation on Characteristics of Flow Field of Wake Galloping
Sunjoong KIM, Ho-Kyung KIM, Ho LEE .................................................. 260

Wind-resistant study on the steel middle pylon of Taizhou Yangtze River Bridge Dalei WANG, Zhen ZHANG, Airong CHEN ............................................ 262

Vortex-induced Vibration and Aerodynamic Countermeasures for Long-span Cable-supported Bridges with Twin Box Girder YongXin YANG, Yao Jun GE ............................................................. 264

Aerodynamic Characteristics of the PCT Girder Bridge under Construction by Free Cantilever Method Younghak KWAK, Young-Min KIM, Seung-Hwan Sin .............................. 266
Vortex-induced vertical vibrations on twin box sections
Abraham SÁNCHEZ, Guido MORGENTHAL ........................................ 268

Flutter stability studies of long span suspension bridge deck by CFD numerical simulation
Hao ZHAN .............................................................................270

4C. Cable-Stayed Bridge Projects

2nd Nile Bridge at Jinja, Uganda - Independent Design Check
Steve KITE, Diego TRIPIDI, Jonathan TUGUME, Itsuro SAKAI ..................274

Installation of the largest stay cable system in Poland - the Rędziński bridge in Wrocław
Paweł HA WRYSZKÓW, Maciej HILDEBRAND .....................................276

Cable-stayed Bridge over the Odra River in Wroclaw, Poland
Jan BILISZCZEK, Wojciech BARCIK, Jerzy ONYSYK, Jacek SZCZEPANSKI, Robert TOCZKIEWICZ, Artur TUKENDORF, Kamil TUKENDORF ............278

Hwayang Concrete Cable-Stayed Bridge with 500 m main span
Jung-Han LEE, Eun-Chul LEE, Eu-Kyeong CHO, Kyung-Ho PARK, Dong-Hyun SIM, Kwan-Woo PARK ..............................................................280

Construction of Cable-Stayed Bridges Built on Temporary Supports
Jose LOZANO-GALANT, Lidia RUIZ-RIPOLL, Ignacio PAYA-ZAFORTEZA, Dong XU, José TURMO ..............................................................282

A Cable-stayed bridge with Elliptic pylons
Se Hoon CHOI, Jae Geum KIM, Hee Won SONG, Yang Kwang AHN, Hyun Tae NAM ........................................................................284

Design and Construction of Hwamyung Bridge
Kwang-Soo KIM, Eun-Chul LEE, Chun-Soo LEE, Eu-Kyeong CHO ...............286

S3. The West Gate Bridge Strengthening Project

West Gate Bridge Strengthening Project - Context and Project Objectives
John CUNNINGHAM ...........................................................290

West Gate Bridge Strengthening - Concrete Viaducts
Craig ALLEN, Tim LOGAN, John NOONAN ...................................292

West Gate Bridge: A Case Study on the Use of Carbon Fibre
Grahme WILLIAMS, Riadh AL-MAHAIDI, Robin KALFAT .......................294

West Gate Bridge Strengthening Project - Strengthening of the Main Cable Stayed Bridge
Chris MURPHY, Robert PERCY, Alan PLATT ....................................296

West Gate Bridge Strengthening Project - The Strengthening of Bolted Splices and the use of Torshear Type Bolts
Neil MCFADYEN, Scott TAYLOR, Chris MURPHY, Javier SILLA-SANCHEZ ......298
West Gate Bridge Strengthening Project - The Development of Novel Stiffened Panel Solutions
Chris MURPHY, Emad GAD, Robert PERCY ........................................ 300

West Gate Bridge - Conquering the Logistical Challenges
Alan PLATT .............................................................................................. 302

West Gate Bridge Strengthening Project - Ongoing Operation and Maintenance Strategies
Dimi POLYMENAKOS, Scott TAYLOR, Robert PERCY ......................................... 304

5A. Concrete Members: Performance for Durability (II)

Resistance of Concrete Members without Stirrups to Fatigue Loads
Günter ROM BACH, Matthias KOHL ........................................................... 308

Prestressed SCC Bridge Girders under Monotonic and Fatigue Loading
Nadim WEHBE, Faris MALHAS ................................................................. 310

Static and Fatigue Testing of High Performance Concrete Members
Norbert RANDL, Csaba SIMON ................................................................. 312

Fatigue of Prestressed Concrete Beams with low Shear Reinforcement Ratios - Experimental Investigations
Frederik TEWORTE, Josef HEGGER ............................................................ 314

A Study on Shear Resistance of Perfobond Strip by Using Simple Push-out Specimen
Akinori NAKAJIMA, Masatoshi HASHIMOTO, Soichiro KOSEKI, Yasuo SUZUKI, Minh Hai NGUYEN ................................................................. 316

Shear Capacity of Prestressed Continuous Concrete Beams
Martin HERBRAND, Josef HEGGER ............................................................ 318

Shear Capacity of Reinforced Concrete Slabs under Concentrated Loads
Karin REISSEN, Josef HEGGER ................................................................. 320

The Bond Characteristics of Deformed Bar Embedded in Biaxial Hollow Slabs according to the Hollow shapes
Sung-Hoon KANG, Joo-Hong CHUNG, Seung-Chang LEE ........................................ 322

5B. Structures & Materials: Performance of Steel Members

Buckling Resistance of Steel Curved Bridge Girder Webs
Philippe VAN BOGAERT ................................................................. 326

An alternative approach of fatigue life predictions in orthotropic steel bridge decks
Wim NAGY, Hans DE BACKER, Philippe VAN BOGAERT ........................................ 328

Detailed Study of Perforated Beams with Closely Spaced Novel Web Openings
Konstantinos Daniel TSAVDA RIDIS, Cedric D’MELLO ........................................ 330

Decreasing the hot spot stresses of welded tubular bridge nodes by diaphragm stiffening
Dries STAEL, Hans DE BACKER, Philippe VAN BOGAERT ........................................ 332
Research on Proper Diaphragm Layout of Long-span Continuous Steel-Box-Girder
Ling BAI, Xing FANG .......................................................... 334

Prestress Effect of Composite Girder Bridge with Corrugated Steel Webs
Shuangjie ZHENG, Yuqing LIU, Jun HE, Zhaofei LIN ......................... 336

Mechanical Performance of Composite Truss Bridge with Double Decks
Jun HE, Haohui XIN, Yuqing LIU, Biao MA, Bin HAN .......................... 338

5C. Structures & Materials: Green Initiatives

World's First Thermoplastic Bridges made of Recycled Plastics
John Sang KIM, Vijay CHANDRA .................................................. 342

Design of innovative fabric formed beams in shear
John ORR, Antony DARBY, Timothy IBELL, Mark EVERNDEN, Mike OTLET .... 344

Design of UHPC Wind Turbines
François-Xavier JAMMES, Xavier CESPEDES .................................. 346

Bamboo-concrete Composite Slabs
Guido MORGENTHAL, Hans-Georg TIMMLER .................................. 348

Building integrated Photovoltaics
Barbara SIEBERT ........................................................................ 350

Development of Green Concrete Containing Ternary High Volume SCMs and its In-situ Application
Kwangsoo YOUM, Hyunkye JEON ................................................ 352

Sustainability Design for Raft & Piled-Raft Foundations - green initiative!
Kim Leong TAN ........................................................................ 354

Modern Yurts Are Viable Options For Societal Facility Needs
Stephen KICINSKI ..................................................................... 356

5D. Design of Long-Span Bridges

The Development of Reliability-Based Design Guidelines and Prototype Design of Super Long-Span Bridges
Ho-Kyung KIM, Myeong-Jae LEE, Byung Hong YANG, Byeong-Hoon SONG, HaeSung LEE, Hyun-Moo KOH ........................................ 360

Design Life and Reliability-based Design Concept for Long-Span Cable-Supported Bridge
Inyeol PAIK, Seung Han LEE, Jinho LEE, Jae-Ung YUN, Hae Sung LEE .......... 362

Modelling of truck traffic for long span bridges
Eui-Seung HWANG, Ki-Tae LEE, Do-Young Kim ................................. 364

Design Guidelines for Cable System of Long Span Bridges
Chan Min PARK, Jong Gyun PAIK, Sang Hoon SHIN, Ho Kyung KIM ............ 366
Innovative Infrastructures: Toward Human Urbanism

Seismic Design Guidelines for Super-Long-Span Cable-Supported Bridges in Korea
Ickhyun KIM, Changho SUN ................................................................. 368

Bridge Spanning Up to 2800m
Seungho LEE, Suk CHANG, Myungjae LEE, Soon-Duck KWON .................... 370

Probability Model Estimation of Aberrant Vessel Trajectory Using VTS Data
Hyun-Joong KIM, Wonsuk PARK, Jeong-Hyun LIM, Jun-Kyoung LEE, Hyun-Moo KOH ................................................................. 372

Structural Form Enhancement for Aesthetic Bridge Design
Namhee K. HONG, Hyun-Moo KOH, Sung-Gul HONG, Kyung Sik CHO ............ 374

6A. Sustainable Infrastructures: Assessment & Diagnosis

Diagnosis of Risk on structural failure for deteriorated bridge beams
Rob VERGOOSSEN, Michel BOUTZ, Hans DE VRIES ................................ 378

Probabilistic and Predictive Performance-Based Approach for Assessing Reinforced Concrete Structures: the APPLET Project
Christian CREMONA ........................................................................ 380

Sustainability assessment of road bridges
Martin MENSINGER, Marjolaine PFAFFINGER, Wolfgang SCHNELL .............. 382

Innovative Bridge Assessment Methods using Image Processing and Infrared Thermography Technology
Masato MATSUMOTO, Koji MITANI, Masanobu SUGIMOTO, Kazuaki HASHIMOTO, Rick MILLER, PE ......................................................... 384

Estimation of Dynamic Characteristics of Long-span Bridge Cables Using Image Signal Processing
Sung-Wan KIM, Nam-Sik KIM ................................................................ 386

Assessment methods for historical mild steel structures
Lars SIEBER, Richard STROETMANN ................................................... 388

Experimental verification of numerical models of a long-span cable-stayed bridge over the Odra River in Wrocław
Mieszko KUZAWA, Jan BIEN ................................................................ 390

Magnetostrictive Guided-Wave Technology for Inspection of Cable Supported Bridges
Yufeng ZHANG, Lifeng QIANG, Xinjun WU, Congming ZHU ......................... 392

6B. Sustainable Infrastructures: Seismic Safety

Target Safety Criteria for School Gymnasium Structure
Jun KANDA ....................................................................................... 396

Seismic Response Prediction of Base Isolated Multi-Span Highway Bridge With Different Modeling Techniques for Lead Rubber Bearings
Muhammad Kashif RAZZAQ, Yoshiaki OKUI, Hiroshi MITAMURA, Takashi IMAI ................................................................. 398
Seismic Isolation of a Suspension Bridge Anchor Block
Matt CARTER ........................................................................... 400

Seismic Response of Reinforced Concrete Frames on Pile Foundations
Francesca DEZI, Sandro CARBONARI, Fabrizio GARA, Graziano LEONI ........ 402

Earthquake Response Analysis Model of Offshore Bridge Piers Considering
Fluid-Structure-Soil Interaction
Jin Ho LEE, Jae Kwan KIM .......................................................... 404

Estimation of Seismic Behaviour of Corroded Steel Bridge Plates
Ruwan APPUHAMY, Mitao OHGA, Pang-jo CHUN, Seiji FURUKAWA, Ranjith DISSANAYAKE .............................................................. 406

The development of a structural design method in the pile-head seismic
isolation approach based on static horizontal load tests
Ryuichi TERADA, Takashi FUKUSHIMA, Yuji YAMANO, Masayuki YANAGI,
Miyuki KAIHOTSU, Satoshi MAENO ........................................... 408

6C. Innovative Design Concepts & Codes

Innovation
Man-Chung TANG ..................................................................... 412

Recent Developments in the Design and Construction of Integral Bridges
Hani NASSIF, Suhail ALBHAISI .................................................. 414

Conceptual design of new super-span cable-stayed bridge
Jia HU, Xudong SHAO, Hua ZAHO ................................................ 416

Study for improvements in design codes of timber structures regarding
developments in time
Lilita OZOLA, Aivars BROKANS ................................................ 418

Evaluation of the Current Concrete Design Code on Shear and End Anchorage
of Deep Beams by a Limit Analysis Based on Concrete Plasticity
Hosoon CHOI, Sung-Gul HONG, Young Hak LEE, Heechuel KIM, Dae-Jin KIM ..... 420

New design code for glass structures
Geralt SIEBERT ........................................................................ 422

Abstract: Tower 114 of the King Abdullah Financial District: Analysis and
Design for In-plane Forces
Spencer ROBINSON, Lukasz GRECZKOWSKI, Fergus MCCORMICK ............ 424

6D. The Taizhou Bridge: A Suspension Bridge with Three Pylons

Key Technology of Middle Pylon Design in Three-Pylon Multi-span
Suspension Bridge
Zhu MENGYA, Ji LIN, Ruan JING ............................................... 428

Design of Stiffening Girder for Taizhou Yangtze River Highway Bridge
Dazhang HAN, Hongwei SHAN, Lei DING, Qing ZHOU ............................ 430

Risk Assessment Study on Bridge Foundation in Deep Overlying Stratum
Ce CHEN, Jingguo WANG, Manhong LIU ........................................ 432
Researches on changes of riverbed deposition during caisson construction
Ce CHEN, Bohai JI, Jianchi ZHONG ............................................. 434

Research on the bearing capability of the middle tower caisson foundation of Taizhou bridge
Jing RUAN, Zhaoxiang FENG, Guojian SHAO .................................... 436

Scaled Model Design and Verification of Shaking Table Test of Taizhou Changjiang Highway Bridge
Tianbo PENG, Lei HAN, Yi ZHAO, Jukao YAN .................................. 438

Temperature Effect of Flat Steel Box Girder in Suspension Bridge
Changqing MIAO, Zhaoxiang FENG, Yichun WANG .............................. 440

S4. High-Performance Steel for Construction
Experimental Study on Prefabricated Parallel Wire Strands for Main Cables in Suspension Bridges
Hoon Y OO, Ju-Won SEO, Sung-Hyung LEE, Yeong-Ho PARK ..................... 444

The evaluation of inelastic buckling strength for HSB 800 welded structures
Soo-Chang KANG, Ki-Seok KIM, Jong-Kwan LEE ................................ 446

Establishment of Cable Performance Qualification System
Taek-Ryong SEONG, Kyu-Sik PARK, Jin-Kook KIM, Myung-Hyun NOH, Jong-Kwan LEE ........................................... 448

The Measurement and Control of Cable Tensile Forces in Cable-Stayed Bridge using Laser Vibrometer
Dongwoan KIM, Jintaek JUN, Cheolhwan KIM, Donggeun AHN, Byungsu KIM ........ 450

Structural Design and Behaviour of PSC Beams Prestressed with 2160MPa/2400MPa Steel Strand
Jin-Kook KIM, Taek-Ryong SEONG, Jong-Kwan LEE ............................. 452

Economic Feasibility of Long Span Cable Bridges with Application of High Performance Steel and Wire
Hee Sung KIM, Joon Sang KO, Dong Ho Y OO, Soo Chang KANG, Jong-Kwan LEE .......... 454

Local Buckling Strength and its Statistical Information of Normal and Bridge High Performance Steel Plates
Viet Duc DANG, Yoshiaki OKUI, Koichi HAGIWARA, Masatsugu NAGAI ........ 456

7A. Sustainable Infrastructures Management & Protection of Structures
Long Term Cross Asset Management of Highway Infrastructure
Helmut WENZEL, Robert VEIT-EGGERER, Monika WIDMANN .................... 460

Extending the life of old infrastructure systems: the problem of overweight traffic management
Riccardo ZANDONINI, Daniele ZONTA, Emiliano DEBIASI ..................... 462

Formulation of Long-Term Sustainable Bridge Maintenance Plan for the Department of Rural Roads Bridges in Thailand
Hathairat MANEETES, Chakree BAMRUNGWONG ................................. 464
Infrastructure Management in Portugal: A Survey
Bruno GONÇALVES, José MATOS, Paulo LOURENÇO ........................................ 466

ANZAC Bridge Maintenance Project
Ken O’NEILL, Colin EDMONDS ................................................................. 468

Structural Protection of Long Span Bridges
Wolfgang FOBO, Christian BRAUN ......................................................... 470

Fire Protection Panel for Bridges
Norifumi YANAGISAWA, Shigeru ECHIGO, Osamu OHYAMA, Akimitsu KURITA ................................................................. 472

7B. Sustainable Infrastructures: Repair, Retrofit & Strengthening
Strengthening Solutions for the Extended Service Life of the Galecopperbridge in the Netherlands
Sander den BLANKEN, Gerland NAGTEGAAL, Dimitri TUINSTRA .................... 476

Repair of Alkali-Silica Reaction Damage in a Massive Arch Skewback
Wagdy WASSEF ......................................................................................... 478

Research on Post-Installed Reinforcement for Structural Retrofitting
Norbert RANDL ............................................................................................ 480

High Strength Reinforced Concrete Beams with Exposed Main Steel
Hamid Reza AZIZIPESTEH BAGLO, Mohammed RAOOF ................................. 482

Fundamental Study on Arrangement of Bolted Patch Plate for Repairing Fatigue Crack
Chao PAN, Takashi YAMAGUCHI, Yukiko MITSUGI, Kunitaro HASHIMOTO, Kunitomo SUGIURA, Akihisa KONDO ................................................................. 484

Collapse and Repair of a Beam Support of the General Rafael Urdaneta Bridge,

Crossing the Maracaibo Lake in Venezuela
Luis B.G. FARGIER ......................................................................................... 487

Penang Bridge Stay Cable Replacement
Huy LAM, Haythem AMAMI, Arnaud LEMAIRE, Mohamed KETFI,
Serge MONTENS ............................................................................................. 489

7C. Structures & Materials: Cables for Cable-Supported Structures
Alternative Proposal for Suspension Bridge Cable
Hajime HOSOKAWA, Paul H. MUELLER ......................................................... 492

New Concept for Main Cable of Suspension Bridge
Shinichi KONNO ............................................................................................ 494

Parametric Study on Safety Factor for Cable Slip in Four-span Suspension Bridges
Hee Sung KIM, Yun Ki SOHN, Dong Ho YOO .................................................. 496
Optimum Span Ratio of Cable Stayed-Suspension Bridges
Yong Woo CHO, Yun Ki SOHN, Dong Ho YOO ........................................... 498

DMSUS, Shape-Finding Program for Irregular Suspension Bridge
Kyung Sik CHO, Changsoo KIM, Woo Jong KIM ........................................... 500

Cable-Stayed Bridge Elements Lifetime Optimization Model
Verners STRAUPE, Ainars PAEGLITIS .................................................. 502

Dynamic Response of Concrete Cable Stayed Bridges due to Cable Rupture
Soobong SHIN, Hyeong Gyu GO, Jaecheon KIM, Yuhee KIM, Jinhwan CHEUNG ... 504

7D. Structures & Materials: Joints and Connections

Anchor plates with headed studs as fastening solutions between steel and concrete
Ulrike KUHLMANN, Ana OŽBOLT .......................................................... 508

Design Concept of Steel-Concrete Composite Slab Using an Adhesive
Atsushi OGAWA, Isamu YOSHITAKE, Yasuo WATADA, Yail J. KIM .................. 510

The influence of connections in concrete bridge superstructures made continuous using a high degree of precasted elements
Bart De PAUW, Philippe Van BOGAERT ............................................. 512

Study on Temperature effects of Single Expansion Joint Bridge
Yibin ZHAO, Xudong SHAO, Jia LI, Xiaqin JIN, Jing MA, Jianbiao LIU ............. 514

Tubular trusses with K-joints in bridges
Michael HUBMANN, Mathias EULER, Ulrike KUHLMANN ......................... 515

Finite Element Analysis on the Mechanical Behaviour of High Strength Bolted Friction Type Joint with Filler Plate
Xue PENG, Toshikazu TAKAI, Honghe SUN, Takashi YAMAGUCHI .................. 517

Challenges and solutions for expansion joints on super long span bridges
Pascal SAVIOZ, Thomas SPULER, Colm O’SUILLIEABHAIN .......................... 519

Life-cycle considerations in the selection and use of bridge expansion joints
Thomas SPULER, Rafael LOEHRER, Colm O’SUILLIEABHAIN ....................... 521

P1. Sustainable Infrastructures - A Service Life Perspective

Bridge barriers in relation to the crash testing standards
Wasim QADIR ................................................................................. 524

Strength Decrease of Wood Materials in Kintai-kyo Bridge used 48 Years
Hideyuki HONDA ............................................................................. 526

The Key Technique Development of Fatigue Researches on Steel Bridges and Its New Achievements in China
Xiaoguang LIU .............................................................................. 528
Determining the Flexural and Shear Strength Properties of ‘‘Good Lumber’’ for Low Cost Housing in the Philippines  
Earl Marvin B. DE GUZMAN, Michael Stephen C. GO, Katrina C. TENGKI, Andres Winston C. ORETA .............................................................530

Analysis of the Temperature Changes in the Steel Structure of the Pu lawn Bridge over the Vistula River, Poland  
Hanna ONYSYK .....................................................................532

Design, Full-scale Testing and CE Certification of Seismic Isolators According to the European Norm EN 15129  
Carlos MENDEZ, Gianni MOOR, Colm O’SUILLLEABHAIN ...........................................534

Vibration Properties of 24 old Railway Bridges of Same Structure  
Kodai MATSUOKA, Kiyoyuki KAITO ...........................................536

Assessing the Performance of a Transportation Lifeline in the Philippines, the Light Rail Transit (LRT) System, Under a Large Magnitude Earthquake  
Michael B. BAYLON, LessandroESTELITO O. GARCIANO, Takeshi KOIKE ........538

Yeosu Expo 2012 Big-O Project Especially about Water Stage Changes  
Suk-Rok Jung, Ho-Jun Kim, Su-Yeol Ok ..........................................540

Vehicle Weight Estimation using Bridge Bearing with Embedded Piezoelectric Material  
Won-Seo JANG, Dong-Ho HA, Jinkyo F. CHOO, Nam Seo GOO, Dae-Hyun KIM ........542

A Practical Fog Detection and Dissipating System for the Preventing Fog Hazards of the Long-Span Bridge  
Sanghoon Lee ..................................................................544

Smart bridge cable integrated with Fiber Bragg Grating sensors  
Lihua LIU, Xia ZHAO, Sheng LI, Huajuan XUE, Zhubing ZHOU, Junbing JI ........546

3D Based Parametric Modeling for Automatic Fitting of Longitudinal Girder Shape and Placing Rebar in FCM Bridge  
HyunJung AN, Sang-Ho LEE ....................................................548

**P2. Innovative Design Concepts**

Evaluation of Cracks of Hathaway Precast Concrete Segmental Box Girder Bridge  
Dongzhou HUANG, Bo HU .....................................................552

Application of Incremental Method in Design & Construction of Steel Sheet-Pile Cofferdam  
Zheng Zhi XIA, Guang Song GUO, Guo Ming LI .............................................554

Design & Construction of the Trapezoidal Hanging Basket  
Guang Song GUO, Guo Ming LI, Zheng Zhi XIA ..............................................555

Construction Supervision and Control of Double-Walled Steel Cofferdam for Xin Zao Extra-large Pearl River Bridge  
Guo Ming LI, Bing WANG, Zheng Zhi XIA ......................................................556
Innovative Infrastructures — Toward Human Urbanism

The Design and Construction of Nak-Dong River Bridge
JaeHyoung PARK, JaeHwan KO, ChangHyun KIM ........................................557

The Effects of Holes in the Web on the Multi-stage Prestressed Concrete Girder
Manyop HAN, Chiho LEE, Sangmin LEE ................................................559

Schematic Design of Pan-pipes Shape Pylon for Long-span Bridges
Dutao YI, Xudong SHAO, Lifeng LI, Jianhua HU ..................................561

Reasonable Construction Procedures and Control Methods for a
Concrete-Filled Steel Tube Arch Bridge Erected with Low Buckle Towers
Chuanxi LI, Chuangwen DONG, Yan ZUO, Y uping ZHANG, Hongjun KE ..........563

Statistical Models of Typhoon Intensity and Tracking for Extreme Wind
Speed Estimation
Ga Young KIM, Sungsu LEE, Young Kyu LEE .......................................565

Technology for monitoring side friction of caisson in deep overburden layer
Zhaoxiang FENG, Jing RUAN, Jingguo WANG, Jian WANG ..........................567

Improved Analytical Method for Pile Bent Structure based on Nonlinear
Characteristics
Sangseom JEONG, Jaeyoung KIM .....................................................569

Framed structure enhanced PSC girder design of Seohae viaduct
Chi Dong LEE, Hyoung Won KIM, Sung Don YANG, Jin Il JEONG ................571

Stability Analysis on Middle Steel Pylon of Taizhou Yangtze River Bridge
Zhen ZHANG, Rujin MA, A irong CHEN, Lijia SONG ...............................573

Economical and Ecological Analysis of a Pedestrian Bridge made of
Textile-Reinforced Concrete
Christian KULAS, Josef HEGGER, Claus GORALSKI, Roland KARLE ...........575

Vibration Mitigation of Stay Cable using Optimally Tuned MR damper based
on Frictional Equivalent Model
Peng WU, Hongwei HUANG, Limin SUN .............................................577

P3. New Urban Transportation Structures & Structures & Materials —
Extending the Limits

Design and Construction of Main and Crescent Bridges in Palm Jebel Ali
Jaehong KIM, Yeongseon KIM, Jongho YANG, Shrivatsa KANNAW ............580

Design and Special Feature of Lusail Ring Bridge
Dongjoo KIM, Hyunyang SHIN, Jongho YANG, Hwakshin CHO ..................582

Moolchand extradosed bridge for Delhi metro
Serge MONTENS, Georges MAURIS, Piush JAIN, Mohammad SHAHID, Abdelghani
M Hedden, Rajan KATARIA ...............................................................584

Geometry Control of Mokpo Cable Stayed Bridge: Dimension Based Control
K young-hoon LEEM, Yong Jun HONG, Yoon-soo LEE ............................586

Design and Construction of The Jiayue Bridge in Chongqing, China
Deng YU, Delan YIN, Chunlin DU, Anshuang LIU, Xueshan LIU ..................588
A study on the depth-tunnel mechanized excavation and optimum cross-section in GTX (Great Train eXpress) tunnel
Young Soo CHANG, Yeong Hwan KANG ........................................5 9 0

A Study on Thermal Behaviour of Tube Structures for Super-speed Tube Railway System
Se-Jun PARK, Ki-Yong KO, Sang-Hyo KIM ........................................5 9 2

The Delhi Air Traffic Control Tower: Engineering, architecture and design with TMD for the tallest ATCT in India
Simon HO, Fergus MCCORMICK, Julian SHEPPARD, Elsa DE SÁ CAETANO .....5 9 5

Deriving Optimum Mix Designs for High - Strength Concrete Using Genetic Algorithms
Andres Winston ORETA, Alden Paul BALILI, Bertrand TEODOSIO, Iris Mae MALABATUAN, Analyn Y EE CONCEPCION ........................................5 9 7

Study of Vertical Prestress Loss in Concrete Box Girder Webs with Twice-Tension Strand technique
Yang ZHANG, Xudong SHAO ...................................................5 9 9

Assessment of Coupled Numerical Models applied to semi-integral bridge
Bastian JUNG, Guido MORGENTHAL ...........................................6 0 1

Numerical Approach to Evaluation of Bond Strength of Headed Bars
Jin-Soo, HONG, Hyung-Suk JUNG, Baek-II BAE, Chang-Sik CHOI ..................6 0 3

Development of innovative lightweight cardboard elements for sustainable constructions
Eike W. KLINGSCH, Markus KNOBLOCH, Mario FONTANA .........................6 0 5

Self-adaptive fairing of steel box girder design and studies of flutter stability by CFD numerical simulation
Hao ZHAN, Pan XIAOMIN, Ning Bowei .........................................6 0 7

Research on Stress State in Composite Bridge Deck System with Orthotropic Steel Deck and Thin Reactive Powder Concrete Layer
Junhui CAO, Xudong SHAO, Zhe ZHANG, Bin CHEN, Zhengyu HUANG ..........6 0 9

Structural performance of precast segmental composite pier cap
Chang-Su SHIM, Dong-Wook KIM, Davon KONG ..................................6 1 1

Design and Construction of Wando Grand Bridge in Korea
Wonjin Y U, Jongho Y AN G, Changho CHUN .....................................6 1 3

Mixed Construction of Modular Steel Frames with Concrete Shear Wall Systems
Sung-Gul HONG, Tae-Hyu HA, Hye-Jin KIM ....................................6 1 5

Application of Spatial Grid Model in Structural Analysis of Concrete Box Girder Bridges
Dong X U, Yu ZHAO ..................................................................6 1 7
P4. Structures & Materials - Extending the Limits

Sand concrete using fine sand to build roads in central provinces of Vietnam
Tung TONG TRAN, Thanh Sang NGUYEN ............................................... 620

The analytical study on Influence Factors to Evaluates the thermal properties of Donut type Biaxial Hollow Slab
Hae-Jeong, CHO, Joo-Hong, CHUNG, Seung-Chang, LEE, Chang-Sik, CHOI ........ 622

Shear strength Evaluation of Hybrid Coupling Walls using Finite Element Analysis (FEA)
Ji Hoon CHOI, Baek-II BAE, Chang-Sik CHOI ........................................ 624

Experimental and numerical analysis on dynamic responses of UHPC cable-stayed pedestrian bridge
Jungwhee LEE, Jaegyun PARK, Won-Jong CHIN, Young-Jin KIM, Byung Suk KIM, Jeong-Hwan Jang .................................................. 626

The Development and Application of a Long Span Spliced Girder with Joint Block
Dong-Seok KIM, Jeong-Saeng AHN, Young-Suk PARK, Chul-Young KIM ............ 628

Analysis of the Temperature Measurement Data in Concrete Pylon
Eui-Seung HWANG, Do-Young Kim, Young-Min Kim .................................. 630

Nonlinear 3-D Analysis Method for Piled Raft Foundation under High-rise Building Loads
Sangseom JEONG, Jaeyeon CHO ......................................................... 632

Geum-gang 1st Bridge-Extradosed Bridge with V-Shape Pylon
Hyun Kioo KIM, Jae Kwang LYOO, Yang Kwang AHN, Hyun Tae NAM .............. 634

Determination of the Slip-up Time for Slip-Form System using Surface Wave Velocity
Heeseok KIM, Young Jin KIM, Won Jong CHIN, Hyejin YOON, Byung Suk KIM .... 636

Development of Precast FRP-Concrete Composite Deck for Cable-Stayed Bridge
Sung Yong PARK, Keunhee CHO, Sung-Tae KIM, Jeong-Rae CHO, Byung-Suk KIM ................................................................. 638

A Study to Evaluate Performance Characteristic of Thin Layer Pavements for Long-Span Orthotropic Steel Bridge
Jung Hun LEE, Hee Young PARK, Byeong Seok KWAK, Ie Hyun CHOI, Tae Woo KIM, Hyun Jong LEE ......................................................... 640

Comparison between Y-type Perfobond Rib Shear Connector and Traditional Perfobond Rib Shear Connector with Push-out Tests
Chi-Young JUNG, Seung-Min PARK, Seong-Hwan WON, Sang-Hyo KIM ............. 642

Development of Sensor Embedded Oil Damper for Structural Control System
Jang-Ho PARK, Kwang-Soon PARK, Dong-Ho HA, Wonsuk PARK, Jinkyo F. CHOO ................................................................. 644
Approach for sustainable, small formatted Metal-Concrete-Composite-Slabs
Stephan PIRRINGER, Johann KOLLEGGER ........................................ 646

Effect of Tower Stiffness on Four-span Suspension Bridges
Dong-Ho CHOI, Sun Gil GWON, Ho-Sung NA ..................................... 649

Initial Shape Analysis of Cable-Stayed Suspension Bridge
Dong-Ho CHOI, Ho-Sung NA, Sun Gil GWON ..................................... 651

A study on the target 2D tracking analysis using digital image correlation at bridge deck wind tunnel test
Seung-Taek OH, Nak-Hyun CHUN, Seung-Young YOO, Ho-Yeop LEE,
Hak-Eun LEE ............................................................................. 653

Tension Force Estimation of Cables in Cable Supported Bridges with Considering Initial Curvature Shortening Effect
Dong-Ho CHOI, Wan-Soon Park ...................................................... 655

Local Buckling and Inelastic behaviour of Flexural Members Fabricated from 800MPa Tensile-Strength Steel
Cheol-Ho LEE, Kyu-Hong HAN ...................................................... 657

Dynamic Design of Elastomeric Bearings for Vibration Isolation
Ulrich GERHAHER, Carlos M ENDEZ, Hans-Jakob STREHLER ............... 659
