About IABSE

The International Association for Bridge and Structural Engineering was founded in 1929. Today, it has more than 3900 members in 100 countries. The mission of IABSE is to promote the exchange of knowledge and to advance the practice of structural engineering worldwide in the service of the profession and society.

To accomplish its mission, IABSE promotes cooperation among individuals and groups concerned with structural engineering and related fields. It encourages the awareness of structural engineers about the needs of society and the environment.

For these purposes, IABSE:

- organises conferences, by itself or with other organisations
- publishes the journal *Structural Engineering International*, as well as conference reports and other monographs
- presents annual awards for achievements in research and practice that advance the profession of structural engineering.

Membership Information

For the purpose of determining membership fees *only*, IABSE recognises two country categories: A and B. In the economically favoured A-countries, the full fee applies. In the economically less favoured B-countries, the individual members may choose to reduce their fee by up to half. If in doubt to which category your country belongs, please contact the IABSE Secretariat.

Membership benefits include:

- subscription to the quarterly journal, *Structural Engineering International* (SEI), in print and online (Individual: 1 copy; Collective: 2 copies)
- online access to SEI back issues since 1991
- monthly electronically newsletter
- reduced prices on IABSE publications
- reduced fees at IABSE conferences
- access to Membership-Directory online
- the opportunity to participate in IABSE Committees and Working Groups
- Members' discounts on selected travel services (car rentals) worldwide.

IABSE National Groups may review applications for membership

Structural Engineering

Structural Engineering is the science and art of planning, design, construction, operation, monitoring and inspection, maintenance, rehabilitation and preservation, demolishing and dismantling of structures, taking into consideration technical, economic, environmental, aesthetic and social aspects.

President of IABSE (2007-2010):

Prof. Jacques Combault, France

Executive Director:

Ueli Brunner, Switzerland
